Claim Rejections - 35 USC § 112

Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "for instance" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d). Also, the phrase "less than 50 ppm, preferably less than 10 ppm, more preferably less than 1 ppm, even more preferably less than 500 ppb and even more preferably less than 100 ppb" renders the claim indefinite. Such language includes ranges within ranges. Furthermore, the claim lacks antecedent basis for the amounts of Nickel in claim 1 from which it depends.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Plantema et al. (EP 138241). The claims read on the process of Examples I and II, pages 3-4.

Copious amount of art was found for purifying caprolactam by hydrogenation in the presence (or absence) of a nickel containing hydrogenation catalyst followed by distillation. The references cited by Applicants are considered cumulative.
